

# AMAN SINGH RANA

## AWS Cloud Engineer

+91-9650499746 | amanrana60a@gmail.com | [github.com/aman7cr74](https://github.com/aman7cr74) | [linkedin.com/in/aman-singhrana-720493203](https://linkedin.com/in/aman-singhrana-720493203) | Greater Noida, UP

### SUMMARY

AWS Certified Cloud and DevOps Engineer with 2+ years of experience architecting scalable, resilient cloud infrastructure on AWS. Expertise in VPC design, subnetting, Transit Gateway, Site-to-Site VPN, and VPC Peering. Proficient in CI/CD pipelines (Jenkins, GitHub Actions, AWS CodePipeline, CodeBuild, CodeDeploy), Infrastructure as Code (Terraform, CloudFormation), container orchestration (Kubernetes, Docker, Amazon EKS), and configuration management (Ansible). Improved infrastructure reliability by 30%, reduced MTTR by 35%, accelerated deployment cycles by 40%, cut manual provisioning by 60%, and achieved 20% cloud cost optimization via Reserved Instances and right-sizing. Enforced CIS and NIST compliance across multi-account AWS environments.

### EXPERIENCE

#### AWS Cloud Engineer

Yotta Data Services | 07/2024 | Greater Noida, India

- Architected a hybrid cloud solution using AWS Outposts at NIC data centres, extending EC2, EBS, EMR, and RDS to on-premise environments, reducing latency for e-governance applications by ~40%; implemented a multi-account strategy (Master + Child accounts for MCA, Income Tax, UIDAI) and leveraged AWS Resource Access Manager (RAM) to share Outposts subnets, capacity reservations, and EMR clusters — ensuring departmental isolation with resource efficiency.
- Automated infrastructure configuration and application deployments using Ansible playbooks alongside Terraform and CloudFormation IaC templates, enabling consistent multi-environment provisioning (dev, staging, production) and achieving 20% cloud cost optimization through Reserved Instances, Savings Plans, and right-sizing—cutting manual intervention by 60% and eliminating configuration drift.
- Orchestrated containerized microservices on Amazon EKS using Docker and Helm, implementing Horizontal Pod Autoscaler (HPA) for dynamic workload scaling—optimizing resource utilization and sustaining high-performance under peak demand.
- Enforced multi-account security posture using IAM, AWS Organizations, GuardDuty, Security Hub, KMS, WAF, and Shield—applying CIS Benchmarks and NIST controls for continuous compliance monitoring, automated threat detection, and on-call incident response across dev/staging/prod environments.
- Developed highly available, fault-tolerant distributed systems utilizing ALB/NLB, Route 53 failover routing, CloudFront CDN, and multi-region S3 replication—ensuring low-latency delivery and resilience against regional outages.
- Established centralized observability frameworks using CloudWatch, Prometheus, Grafana, and ELK Stack—enhancing proactive monitoring, accelerating incident response, and improving system reliability by 30% while maintaining 99.9% SLA.
- Designed event-driven, serverless architectures using Lambda, API Gateway, SQS, and SNS—enabling asynchronous processing, cost efficiency, and horizontally scalable system design.
- Architected a production-grade 3-tier AWS infrastructure using Terraform Cloud and CloudFormation, reusable IaC modules, and GitHub Actions / AWS CodePipeline for consistent, auditable deployments across dev/staging/prod—reducing release cycle time by 30%.

### EDUCATION

#### B.Tech

Jaypee Institute of Information Technology

Information Technology | 08/2020 - 05/2024 | Noida | CGPA: 7.00/10.0

### CERTIFICATIONS

- ✓ AWS Certified Solutions Architect - Associate (SAA-C03)
- ✓ AWS Certified Cloud Practitioner (CLF-C03)
- ✓ AWS Certified AI Practitioner (AIF-C01)
- ✓ Google Associate Cloud Engineer (ACE)
- ✓ AWS Certified CloudOps Associate (SOA-C03)

### KEY ACHIEVEMENTS

#### ✓ Infrastructure Automation

Reduced manual provisioning by 60% via Terraform and CloudFormation IaC; cut deployment time by 40% and achieved 20% cloud cost savings via Reserved Instances and right-sizing.

#### ✓ Infrastructure Reliability

Achieved 30% improvement in reliability, maintaining 99.9% SLA standards.

#### ✓ Cloud Security & Compliance

Enforced multi-account security policies aligned to CIS Benchmarks and NIST standards; implemented continuous compliance monitoring with Security Hub and GuardDuty.

### KEY SKILLS

#### ✓ AWS Services

**Compute & Containers** — EC2, Lambda, EKS, ECS, Auto Scaling

**Storage & Database** — S3, EBS, RDS

**Networking & Delivery** — VPC, Subnets, ALB/NLB, Transit Gateway, Site-to-Site VPN, VPC Peering, Route 53, CloudFront

**API & Messaging** — API Gateway, SNS, SQS, EventBridge

**Security & Governance** — IAM, GuardDuty, Security Hub, AWS Organizations, KMS, WAF, Shield

**AI & ML** — Amazon Comprehend, Amazon SageMaker

#### ✓ DevOps Tools

Docker, Kubernetes, Jenkins, GitHub Actions, Terraform, CloudFormation, Ansible, Helm, ArgoCD, SonarQube, AWS Outposts

#### ✓ Monitoring & Logging

CloudWatch, Prometheus, Grafana, ELK Stack, Log Aggregation

#### ✓ Programming

Python (Boto3, Flask, PySpark, NumPy, Pandas) | Bash Scripting | JSON | PostgreSQL | Linux Administration

### SOFT SKILLS

Leadership & Team Collaboration

Communication & Documentation

Cross-functional Collaboration
